The Welding Journal

Index to Volume 22—1943

Published by the American Welding Society, 33 West 39th Street, New York 18, N. Y.

Part I—The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, news, biographical items, current welding literature and advertising.

Page Allocation by Issues

January.....	1- 68	July.....	495–588
February.....	69–152	August.....	589–672
March.....	153–220	September....	673–764
April.....	221–304	October.....	765–884
May.....	305–396	November....	885–972
June.....	397–494	December.....	973–1084

Part II—Welding Research Supplement

This section includes the reports of the Welding Research Council, critical digests of the literature, reports of the Project Committees and Research Reports of Industry.

Page Allocation by Issues

January....	1-s- 56-s	July.....	273-s-328-s
February...	57-s- 96-s	August.....	329-s-376-s
March.....	97-s-144-s	September..	377-s-440-s
April.....	145-s-184-s	October.....	441-s-544-s
May.....	185-s-224-s	November..	545-s-592-s
June.....	225-s-272-s	December...	593-s-640-s

PART I—THE WELDING JOURNAL

SUBJECT INDEX

Aircraft Construction, Welding in—H. O. Klinke, 412–416.
Aircraft, Inspection of Arc Welding in—J. B. Johnson, 1026–1027; discussion by W. S. Evans, 1027–1028.
Aircraft, Redesign in—R. W. Cripe, 1026.
Aircraft Operators, Minimum Requirements for Instruction of, 522–544.
Aircraft Propeller Blades Welded—C. A. Liedholm, 165–172.
Aircraft Propeller Blades—Dr. Elek K. Benedek, 335–338.
Aircraft—Surface Treatment of Aluminum-Alloy Assemblies Prior to Spot Welding—H. O. Klinke, 602–604.
Airplane Construction, Application of Flash Welding in—C. B. Smith, 769–775.
Aluminum-Alloy Assemblies Surface Treatment Prior to Spot Welding—H. O. Klinke, 602–604.
Armor Plate Welding Techniques—E. G. Biederman, 516–519.
Automatic Electric Welding in Production Work—J. M. Keir, 173–179.
Automobile Racing Brackets Welded—E. W. Jacobson and F. F. Versaw, 499–503.

Bed Springs, Metal, Welded—E. H. Atkinson, 239–241.
Boiler, Locomotive, Welded—E. G. Young, 823–827.
Bridge, Swing, Semi-Welded—B. M. Shimkin, 716–718.

Caissons, Welded for Naval Dry Docks—Capt. C. A. Trexel and A. Amerikian, 157–164.
Cast Steel—H. R. Morrison, 418–420.
Clamps, Plate-Carrying—Louis Hardnack, 618.
Copper and Copper Alloys, Welding Methods for—J. J. Vreeland, 784–792.
Corrosion—Cause and Cures—C. H. Jennings, 712–715.
Cracked Welds—Cause and Cures—C. H. Jennings, 712–715.
Crankshafts Reclaimed—W. B. Meyer, 426–429.
Cutting and Welding in a Modern Shipyard, Part 1—W. B. Bowen, 904–911; Part 2, 1017–1025.
Cutting and Welding One-Piece Press Stand—H. E. Berg, 601–602.
Cutting for Assembly Line Fabrication—C.O. Adams, 776–779.
Cutting Heavy Sections and Large Diameters—R. L. Deily and E. Benyo, 1006–1016.
Cutting Operator, Kinks for—R. S. Babcock, 439–440.

Deep Fillet Welding Applied to Ship Construction—M. H. MacKusick, J. B. Hiatt and R. V. Anderson, 998–1004.
Deep Fillet Welding Technique and Application—M. H. MacKusick, J. B. Hiatt and R. V. Anderson, 401–408.
Designing for Production Welding—H. A. Oldenkamp, 24–26.
Design of Welded Steel Structures—H. Malcolm Priest, 677–711.
Developments, Arc Welding, 1942—R. F. Wyer, 238, 245.
Display Holder for Printed Matter—V. P. Weidner, 322.
Distortion—Cause and Cures—C. H. Jennings, 712–715.
Distortion Correcting in Low Carbon Steel Used in Shipbuilding—Matt D. Offen, 14–16.

Electrodes, Conservation—H. Carey Boss, 246–247.
Electrode Usage to Increase War Effort—C. J. Holslag, 250–251.
Electrodes, Welding—J. W. Miller, 718–720.

Fatigue, Avoid—H. H. Griffith, 720.
Flame Cutting Heavy Sections and Large Diameters—R. L. Deily and E. Benyo, 1006–1016.
Flame Hardening, New Developments in—Stephen Smith, 21–23.
Flame Hardening Ordnance Materials—Stephen Smith, 911–917.
Flash Welding in Airplane Construction—C. B. Smith, 769–775.
Flux, Functions of—H. H. Griffith, 429–430.

Gas Cutting for Assembly Line Fabrication—C. O. Adams, 776–779.
Gas Cutting Heavy Sections and Large Diameters, R. L. Deily and E. Benyo, 1006–1016.
Gas Cutting—Improved Methods of Machine—H. E. Rockefeller 93–99.

Hard Facing—J. R. Spence, 179–181.
Health Aspects of Welding—A. G. Cranch, M.D., and B. L. Vosburgh, M.D., 343–346.
Heaters, Fuel Oil Welded—H. S. Card, 513–514.
High Carbon Steel—H. R. Morrison, 418–420.
Hoist, Portable—S. Craig Cairns, 903.

Inspection for Pressure Vessels and Piping—Wm. D. Halsey, 821–822.
Inspection of Arc Welding of Aeronautical Equipment—J. B. Johnson, 1026–1027; discussion by W. S. Evans, 1027–1028.
Inspection of Welded Structures—R. B. Lincoln, 919–920.
Instruments, Welded String—J. R. Morrill, 1028.

Job Shops—Production of Small Items—C. M. Taylor, 520–521.

Locomotive Boiler Welded—E. G. Young, 823–827.
Locomotive, Freight, All-Welded—John H. Hruska, 605–618.
Locomotive Parts Fabrication and Welding of Bronze Bearing Surfaces—J. W. Kenefic, 799–805.

Machine, Metal Forming—E. W. Allardt, 319–321.
Machine, Paper, Welded—R. S. Conabee, 504–512.
Maintenance—Railroad Locomotive—J. W. Kenefic, 799–805.

Maintenance—Reconditioning Worn Pump Shafts and Rods, 248–249.
Maintenance—Salvage Is the Answer to Scarcity of Replacement Parts—R. B. Aitchison, 5–9.
Maintenance Welding—H. H. Griffith, 902–903.
Mechanical Load Handling Equipment—E. W. Weaver, 619–623.
Mechanical Properties of Carbon Steel Weld Metal in Arc Welding—O. T. Barnett, 108–113.
Milling Propeller Blades, Machine for—P. W. Martin, 323–326.
Minimum Requirements for Instruction of Welding Operators for Gas Welding Aircraft—522–544.

Office Chair—E. T. Spencer, 351–352.
Ordnance Flame Hardening—Stephen Smith, 911–919.
Ordnance—The Redesigned 40-Mm. Anti-Aircraft Gun Carriage—J. L. Miller, 99–107.
Ordnance—Weapons in War—Col. S. B. Ritchie, 893–901.

Paper Machine Welded—R. S. Conabee, 504–512.
Pipe Lines—Welding Procedure in "Big Inch"—J. R. Morrill, 416–417.
Pipe—Welded Valve—S. Craig Cairns, 1081, 1083.
Piping, American Standard Code for Pressure, 182–187.
Piping and Pressure Vessels, Inspection for—W. D. Halsey, 821–822.
Power—Outdoor Substation Structure Designed for Welding—R. W. DeVore, 593–599.
Press Stand Made by Flame Cutting and Welding—H. E. Berg, 601–602.
Pressure Vessels and Piping, Inspection for—W. D. Halsey, 821–822.
Pressure Vessels—Developments in the Design of Storage Water Heaters—S. Arnold Smith, 327–334.
Production Welding, Designing for—H. A. Oldenkamp, 24–26.

Qualifying Welders by X-Ray Method—C. G. Lutts, S. D. Herbein and L. W. Pote, 31–34.

Radiographic Inspection Technique Applied to Special Welding Problems—Don M. McCutcheon, 16–20.
Railroad—Freight Locomotive, All-Welded Diesel-Electric—John H. Hruska, 605–618.
Railroad—Locomotive Boiler Welded—E. G. Young, 823–827.
Railroad—Locomotive Maintenance—J. W. Kenefic, 799–805.
Railroad—Passenger Cars, Design and Construction of Underframes for All-Welded—J. E. Candlin, Jr., and A. M. Unger, 309–318.
Railroads—Welding Applications—Robert Moran, 793–798.
Reclaiming Crankshafts in an Engine Lathe—W. B. Meyer, 426–429.
Reclamation—Saving Steamboat Propellers from the Scrap Heap—H. C. Elliott, 326.
Reclamation—Tool Salvaging—Bent Laune, 423–425.
Residual Stresses in Welded Structures—R. E. Kinkead, 514–515.
Resistance—Weld Recorder—J. R. Fetcher and J. Van Den Beemt, 815–818.
Resistance—Welded Steel Tubing—Its Quality Control and Application—R. D. Malm, 818–821.
Resistance Welding—Application of Copper Oxide Rectifiers for—R. L. Briggs, 252–256.
Resistance Welding Below the Frost Line—A. L. Munson, 339–342.
Resistance Welding Controls in the War Effort—H. L. Palmer, 347–349.
Resistance Welding Developments and Operations—R. T. Gillette, 116–119.
Resistance Welding Machines, Application of Series Capacitators to—R. M. Partington, 26–31.
Rigid Arc-Welded Connections—R. P. V. Marquardsen, 256–261.

Safety Precautions for Preventing Personal Injury to Welding and Cutting Operators—H. L. Reinhard, 624–625.
Seam Welding of Low Carbon Steels—A. W. S. Emergency Standard, 431–432.
Shipbuilding—All-Welded Liberty Ship Construction in New Orleans—E. B. Williams, 241–245.
Shipbuilding—Control of Welding in—LaMotte Grover, 227–238.
Shipbuilding—Principles of Shrinking and Straightening Distorted Low Carbon Steel—Matt D. Offen, 14–16.
Shipbuilding, Some Observations on—David Arnott, 73–92.
Ship Construction, Deep Fillet Welding in—M. H. MacKusick, J. B. Hiatt and R. V. Anderson, 998–1004.
Ship Construction, Structural Failures in—Committee Report, 980–984.
Ships, Fractures in Welded—John Tutin, 721–723. Discussion by Ralph Spaulding, 723–724. Discussion by R. T. Young, 1004–1005.
Ship Ventilators—W. A. Pruett, 1005–1006.
Ship Welding—Application of Welding in Submarine Construction—E. H. Ewertz and R. D. West, 10–13.
Ship Welding—Cargo Vessels—A. F. Davis, 430.
Ship Welding—Report on Failure of Tanker S. S. "Schenectady," 225–226.
Shipyard, Production Welding in—Part 1—W. B. Bowen, 904–911; Part 2, 1017–1025.
Shipyard Welding, Maritime Instructions for—985–998.
Shipyards, Thermit Welding in—J. H. Deppeler, 977–979
Silver Brazing and Its Application in War Work—C. M. Robbins, 410–411.
Spot Welding and Seam Welding of Low Carbon Steel—A.W.S. Emergency Standard, 431–432.
Spot Welding—Surface Treatment of Aluminum-Alloy Assemblies—H. O. Klinke, 602–604.
Storage Water Heaters, Developments in the Design of—S. Arnold Smith, 327–334.
Stresses—Cause and Cures—C. H. Jennings, 712–715.
Stresses in Welded Ships—John Tutin, 721–723; discussion by Ralph Spaulding, 723–724; discussion by R. T. Young, 1004–1005.
Structural Design, Application of Welding in—S. A. Greenberg, 409–410.
Structural—Efficiently Rigid Arc-Welded Connections—R. V. P. Marquardsen, 256–261.
Structural—Outdoor Substation Designed for Welding—R. W. DeVore, 593–599.
Structures, Inspection of Welded—R. B. Lincoln, 919–920.
Structures, Practical Design of Welded Steel—H. Malcolm Priest, 677–711.
Substation Structure Designed for Welding—R. W. DeVore, 593–599.

Tanks, Light Combat—William Osha and J. W. Sheffer, 780–783.
Testing of Welds—H. V. Inskeep, 889–892.
Thermit Welding in Maritime Commission Work—J. H. Deppeler, 977–979.
Tool Salvaging by Low Temperature Joining—Bent Laune, 423–425.
Torch—Heating Tip—A. W. Flint, 172.
Training of Welding Foremen—F. H. Achard, 113–115.
Training Ship Welders—408.
Training Schools for Welders—J. G. Sherbo, 599–600.
Training Soldier Welders—Martin M. Forman, 349–350.
Training Welding Operators—A. N. Kugler, 806–814.
Training Welding Operators—C. B. Herrick, 921–922.
Training Welding Operators, Minimum Requirements for Instruction of Aircraft, 522–544.
Training with the Aid of the Picture Screen—L. S. Metcalfe, 120.
Troubles, Cause and Cure of 14 Common Welding—C. H. Jennings, 712–715.
Tubing, Resistance Welded Steel—R. D. Malm, 818–821.

Unionmelt Welding in Production Work—J. M. Keir, 173–179.

Valve Welded—S. Craig Cairns, 1081, 1083.

Weldability of National Emergency Steels—A. N. Kugler, 432.
Weldability of Steels, Tentative Tests for—433–438.
Weldery Plant—L. H. Burr, 421–423.
Wrought Iron, High Carbon Steel and Cast Steel—H. R. Morrison, 418–420.

X-Ray Inspection—Technique Applied to Special Welding Problems—Don M. McCutcheon, 16–20.
X-Ray Method *vs.* Guide Bend Method of Testing Arc Welders—C. G. Lutts, S. D. Herbein and L. W. Pote, 31–34.

AUTHOR INDEX

American Bureau of Shipping—Report of the Findings of the Special Sub-Committee Appointed by the American Bureau of Shipping to Investigate the Structural Failure of The Tanker S. S. "Schenectady," 225–226.
American Standard Code for Pressure Piping—Chapters 4 and 5, 182–187.

Welding Research Council

PART II—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Aircraft Industry, Survey of Arc-Welding Practice—Maurice Nelles, 79–81.
Aircraft Steels, Spot Weldability of, 616–640.
Aircraft Structural Steels, Weldability Tests of—C. B. Voldrich and R. D. Williams, 545–554.
Aircraft Structures, Weldability of NE 8630 Steel—A. R. Lytle and K. H. Koopman, 82–93.
Aircraft Tubing, Fatigue Tests of Oxyacetylene Welded, 62.
Aircraft Tubing, Structural Butt Welding—H. J. Mastenbrook and H. J. Steffen, 51–56.
Aircraft X4130 Steel Tubing—W. T. Tiffen, 613–615.
Air Frames—Weldability Tests on N.E. 8630 Steels—Morse Hill, 300–304.
Aluminum Alloys, Spot Welding of—Gordon H. Field, H. Sutton, H. E. Dixon, 573–592; Discussion by G. O. Hoglund, 592.
Aluminum Alloys, Spot Weld Joint Efficiency in—C. W. Steward, 528–532.
Aluminum Brazing Sheet—Fundamentals of Metal Flow—Mike A. Miller, 596–604.
Arc, Physics of and the Transfer of Metal in Arc Welding—W. Spraragen and B. Lengyel, 2–42; Discussion by C. J. Holslag, 222–223.
Arcs—Cathode Drop and Electron Density of Welding Arcs—G. H. Fett, 223–224.

Bi-axial Tension Tests of Thin Hemispherical Shells Subjected to Internal Hydrostatic Pressure—W. M. Wilson and Joseph Marin, 214–220.
Bi-axial Tests—Spherical Containers for Transporting Gas Under High Pressure, 304–307.
Brazing Aluminum Sheet—Mike A. Miller, 596–604.

Carbon-Manganese Steels, Weldability Tests of—A. P. Edson, 78–79; W. Spraragen and H. H. Chiswik, 225–263.
Carbon-Molybdenum Steel Pipe, The Effect of Normalizing on The Properties of Welds—I. A. Rohrig, D. H. Corey and Sabin Crocker, 521–527. Discussion, 604.
Carbon-Molybdenum Steels—W. Spraragen and H. H. Chiswik, 225–263.
Carbon-Nickel Steels—W. Spraragen and H. H. Chiswik, 225–263.
Carbon Steels—Weldability Bead Hardness Tests—O. E. Harder and C. B. Voldrich, 441–450, 615.
Cast-Iron Welding, Silicon Loss Between Rod and Deposited Metal—R. M. Allen, F. F. Dennis and G. Swartz, 179–181.
Chromium-Nickel Steel at Low Temperatures, Mechanical Properties of, 437–438.
Chromium-Nickel Steels, Weld-Bead Hardness Tests—O. E. Harder and C. B. Voldrich, 441–450, 615.
Chromium Molybdenum Titanium Steel, Welding of 4 to 6%—Ernest H. Wyche, 142–144.
Cooling Curves of Welds by Means of Electrical Analogy—V. Paschkis, 462–483.
Cooling of Spot-Welding Electrodes by Refrigeration—W. F. Hess, R. A. Wyant, O. E. Stabler and F. J. Winsor, 555–567.
Cooling Rates Associated with Arc Welding and Their Application to the Selection of Optimum Welding Conditions, Report No. 1—W. F. Hess, L. L. Merrill, E. F. Nippes, Jr., and A. P. Bunk, 377–422.

1943 BOUND VOLUME

Bound Volumes of the JOURNAL of the Society for the year 1943 are now available with imitation black leather covers. Contains a wealth of information on the latest developments in welding. Also contains Subject and Authors' Index. Price, $6.00 plus postage to members; $7.00 to non-members plus postage.

SETS OF BOUND VOLUMES OF THE JOURNAL

In order to provide some of the new members of the Society with an opportunity to complete their library on Current Welding Literature, the AMERICAN WELDING SOCIETY is offering to these new members an opportunity to purchase the last nine bound volumes for the years 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942 and 1943 at $50.00 a set plus postage. The price to non-members for individual volumes is $7.00 and for the set $55.00 plus postage.

Each bound volume contains a Subject and Authors' Index and is bound in attractive imitation black leather covers. The set probably includes the most important welding information available in the literature.
